FreeForm-Edit

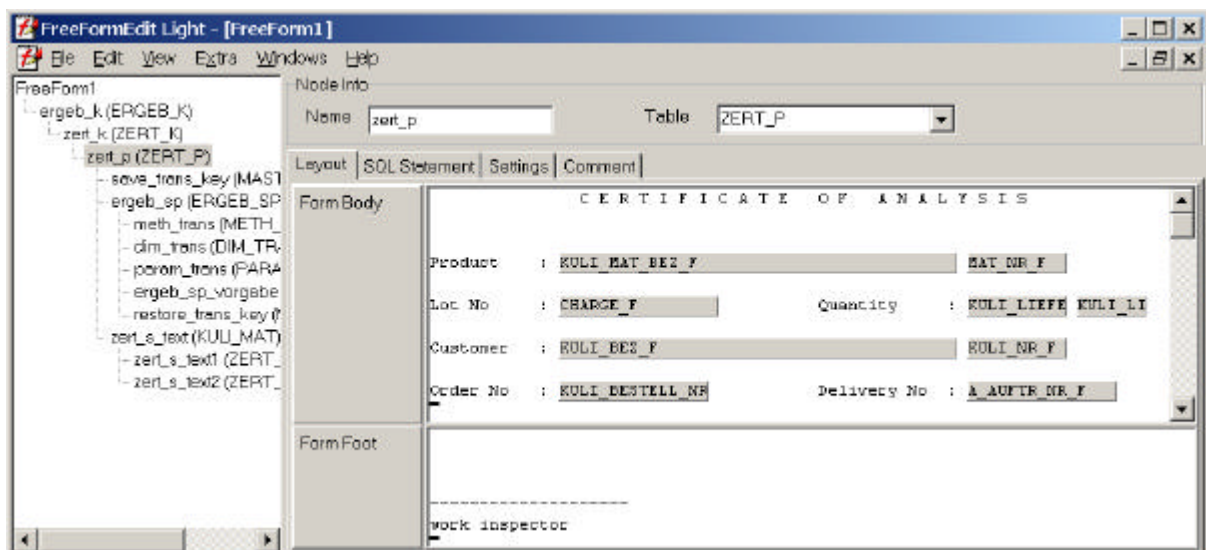

Program for designing FreeForm reports for LABS/Q®

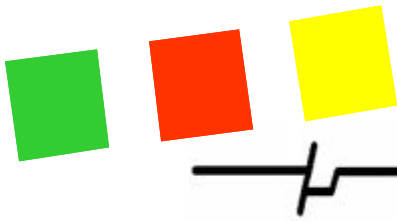

Short description

FreeForm reports are the way you can define and create LABS/Q® Reports without the need to use external report tools. FreeFormEdit is the tool of your choice to design these reports in a simple and comfortable way. Using a Windows user interface, it can display FreeForms in a clearly arranged way. It generates the FreeForm files and can therefore overcome a common source of systematic and syntactical errors on creating the FreeForm file. Many more possible errors are indicated by the program while designing the FreeForm. Using its import functionality it is a good tool for viewing existing FreeForms.

Design by Drag & Drop

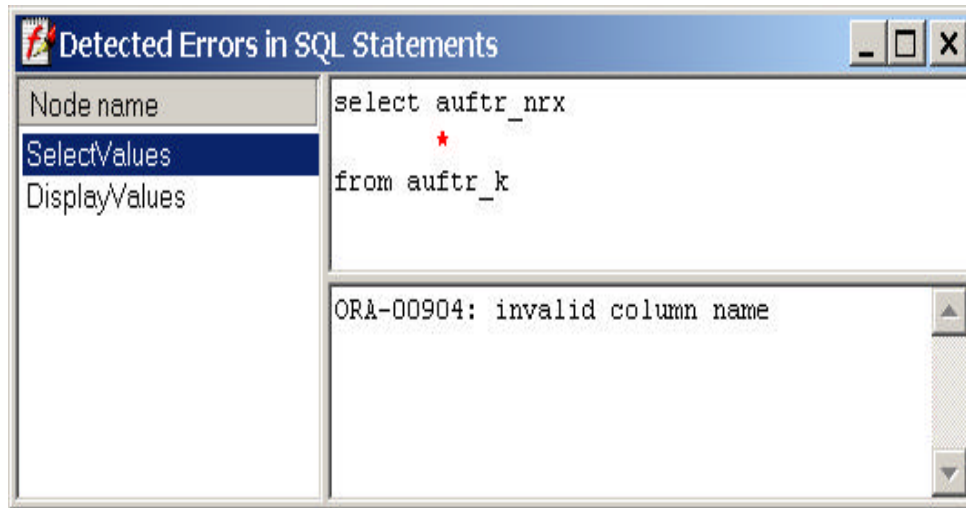

Use simple drag & drop mechanism to place output fields on the desired place in the layout. Move them with the mouse – FreeFormEdit will do the correct representation in the FreeForm report.

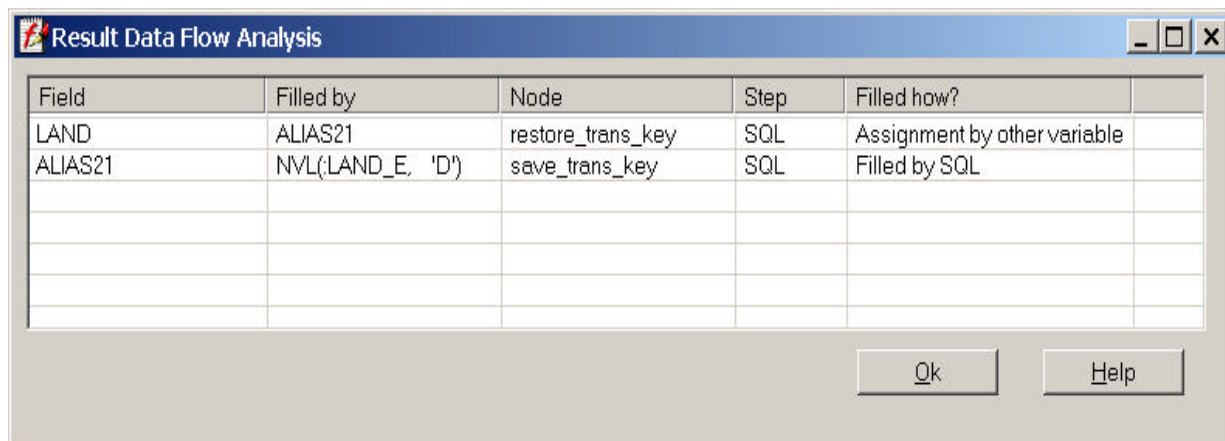

SQL syntax check

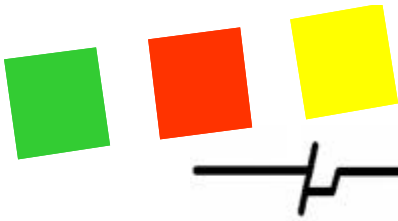

Perform a SQL syntax check of the creates SQL statements directly in the program. It will show you the errors you made.

Data flow analysis

A mighty tool to find out, which variables of the report have which values on any step of the FreeForm execution. So you have full control of the data in your report.

Error recognition

Many errors that you can make when you create FreeForms with an ordinary text editor can't be made when you use FreeFormEdit. Other errors are detected automatically and will be presented to you.

Copy and move nodes

You can move and copy FreeForm nodes. FreeFormEdit will guarantee the correct FreeForm output. (A FreeForm node defines a part of a FreeForm including layout and SQL information for this part.)

Templates

You can define templates for layouts and SQL statements, which you can use with the touch of a key. This allows for concise layouts and design and also serves as a simple library for common solutions.

Multiple language support

The program is delivered in English and German. It can easily be translated to other languages by editing a plain text translation file.

Result

Using FreeFormEdit and HTML you can create appealing LABS/Q®-Reports on your own.

FreeFormEdit Light/Pro

FreeFormEdit Light is available free of charge with restricted functionality. FreeFormEdit Pro is liable for costs, but therefore offers full FreeFormEdit functionality. Additionally it will accord support on technical problems.

The restrictions for FreeFormEdit Light mainly comprise convenience functions. Additionally, the (modern) stream oriented FreeForm are only available with FreeFormEdit.

Frechen, den 06.05.2004

Prüfbericht - 000002045

Untersuchungs-Nr.: 000002045 Tag der Einlieferung: 19.01.2004 Beginn der Untersuchung: 19.01.2004 16:16
Profilgegenstand: Ende der Untersuchung: 21.01.2004 13:58
Herkunft:
001 / Wasserprobe 31 Entnommen: 19.01.2004

| Herkunft/Probe: | | 001 / Wasserprobe 31 | | |
|---------------------------------------|----------|----------------------|----------------------------|------------------------|
| Merkmale | Ergebnis | Dimensionen | Norm | Messunsicherheit (± %) |
| Wassertemperatur | 12,7 | °C | | ±0 |
| pH-Wert | 5,75 | | elektrometrisch, 20 °C | ±0 |
| Spezifische elektrische Leitfähigkeit | 412 | µS/cm | DIN EN 27888-C:3 (1993-06) | ±0 |

Bemerkung:
Die untersuchte Trinkwasserprobe entspricht hinsichtlich der untersuchten Parameter den Anforderungen der Trinkwasserverordnung.
Die Prüfergebnisse beziehen sich ausschließlich auf die untersuchten Profilgegenstände. Ohne schriftliche Genehmigung des Prüflaboratoriums darf dieser Prüfbericht nicht ausgeweitet veröffentlicht werden.
Mit freundlichen Grüßen
